To Whom It May Concern,

I offer this letter of recommendation for Ace Solar, LLC based on my personal experience in doing business with their company and employees. As my interest in solar power reached the point of acquiring information and installation costs/designs, ACE Solar, LLC was one of three companies that reached out to me to satisfy my needs.

Their commitment to understanding and analyzing my solar needs were open and forward. They were extremely helpful in the massive amount of required paperwork required for local, state, and federal approval. We found their employees to be responsible and very competent in their fields. Our system was professionally installed and is operating flawlessly. No surprises were entertained and their workmanship is greatly appreciated.

I would highly recommend Ace Solar, LLC and Chuck Boggs to any and all persons seeking solar systems. Every conversation, meeting, and discussion was handled professionally and openly. And most important their service after installation has been excellent.

Sincerely,

Steven B. Pierce
